x-Track - Asset Tracking and Management Software

## Overview

Managing and tracking your assets is crucial in preserving your business capital and couldn't be easier utilising **x-Track** Asset Tracking Management software from Cross-Check Systems.

- Do you know the value of your assets?
- Where are your most valued company assets?
- Can you identify areas of significant loss?
- Spending days tracking your company's assets at the end of your financial year?

When assets are on the move they can easily get lost. Our asset tracking software will solve this issue for you. In addition, you'll be able to identify any missing assets, produce a printed report and charge the relevant customer for the loss. Later on, if the asset is returned, you'll be able to credit the customer accordingly.

### How does it work?

Simply by adding a barcode or RFID tag (dependent on system requirements) to assets such as computers, power tools, pallets or roll cages, you can check if your asset has been returned or track them to a specific location. We develop our core product into an affordable asset management solution configured exactly as you wish and designed around your process.

### What kind of asset tracking is available?

#### Pallet/Roll Cage Tracking

With our **x-Track** Pallet Asset Tracking System, you'll have real-time visibility of your pallets through RFID technology. Avoid damaged or lost pallets by embedding each with an RFID tag. Returned pallets can be inspected and the relevant customer charged if damage is discovered. Paperwork is significantly reduced because all collected information is written on the RFID tag and stored on the management software.

#### Power Tool Tracking

Tracking power tools has long been the Achilles heel of many a store. After all, they are quite desirable objects and are frequently lost or stolen. The challenge is, who knows whether that equipment will be returned damaged... or returned at all?

Tracking your power tools with **x-Track** Asset Tracking Software makes your workforce accountable for their loan equipment. Placing a unique barcode, 2D code or an RFID asset tag on your equipment is easy. A quick scan will inform you of the equipment's type, kit components, who it was issued to, the period of time the loan is valid for, and more. **x-Track** will record exactly where the item is, giving you peace of mind.

#### Computer, Laptop & Tablet Tracking

Not all of your company's assets are stock related. Keeping your IT equipment running is paramount to keeping your business on the move. Using direct part marking & 2D codes you can record information such as laptop number, basic software information, and where the assets are allocated.

# SYSTEM REQUIREMENTS

## Minimum requirements

Windows Server 2019

Linux-based preferred distro: CentOS 7

### Linux

- 50 GB HD or SSD
- Dual-Core CPU
- 2.5 GB RAM

### Windows

- 100 GB HD or SSD
- Quad-Core CPU
- 8 GB RAM

## > 15 - 50 users concurrently

### Small Server

#### Linux

- 100 GB HD or SSD
- Quad-Core CPU
- 6 GB RAM

#### Windows

- 150 GB HD or SSD
- Octa-Core CPU
- 8 GB RAM

## > 5 - 100 users concurrently

### Medium Server

#### Linux

- 300 GB HD or SSD
- Quad-Core CPU
- 16 GB RAM

#### Windows

- 350 GB HD or SSD
- Octa-Core CPU
- 16 GB RAM

## > 101+ users concurrently

### Advanced Server

#### Linux

- 500 GB HD or SSD
- Octa-Core CPU / Deca-core CPU
- 32 GB RAM

#### Windows

- 550 GB HD or SSD
- Octa-Core CPU / Deca-core CPU
- 32 GB RAM

## Database requirements

SQL Server 2019 is recommended.

x-Track can run on older versions of SQL Server.

## Hosting

x-Trackhosting is completely flexible.

Can be hosted on your internal servers or hosted in the Cloud.

x-Track functions seamlessly with Microsoft Azure and Amazon Web Services (AWS).

## Integrations

We can integrate x-Track with a wide range of applications. Common integrations include SAP & ERP.

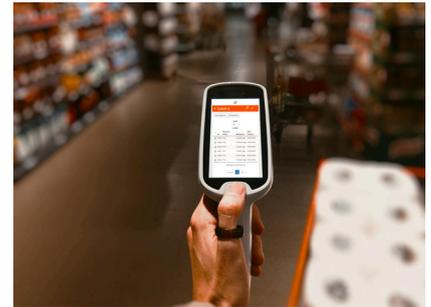

Please contact us to discuss any integration requirements.

# HARDWARE

We have over 16 years of experience working with a range of mobile computer and barcode readers. With this in mind, it was important to us not to be tied to any specific hardware manufacturers.

This independence means we can offer you the best hardware to suit your budget and needs. All hardware is fully compatible with x-Track and comes complete with full manufacturer's warranty for peace of mind.

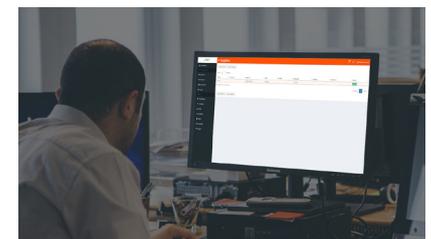

Full training is provided on all hardware supplied.

# UK TECHNICAL SUPPORT

Our UK Support Team support all software applications developed by Cross-Check Systems including bespoke software systems running on host PC's, servers, cloud based servers, mobile computers, tablets and phones.

Pin-Point takes the guesswork out of purchasing application support and minor changes required to your application. Pin-Point is based around the philosophy of paying a set monthly fee for on demand software support so it's there for you when you need it.

**Pin-Point**  
There when you need it
